6th LNG SUPPLY, STORAGE & TRANSPORTATION PHILIPPINES FORUM 2020

21-22 July 2020

Marquis Events Place, Bonaficio Global City, Manila Philippines

Developing and Integrating The Natural Gas and LNG Value Chain to Support Upcoming LNG Import and Storage Infrastructure for The Power Generation Industry

RATIONALE AND OBJECTIVE BEHIND THE 2020 EVENT

The Who's Who in the region's LNG and Natural Gas circle is set to gather once again at the most anticipated and targeted annual 6th LNG Supply, Transport & Storage Philippines forum will take place on 21 - 22 July 2020 at the Marquis Events Place @ Bonaficio Global City, Manila, Philippines.

It is inevitable that the Philippines will urgently address the need to push forward with new natural gas and LNG infrastructure development for the power generation industry as we move into the new decade. The need to procure and import LNG in the near and long term is a certainty and will be the quickest way to meet increasing domestic demand as we move into 2020. As more power utilities are turning to natural gas to diversify their portfolio and ensure security of supply, LNG's role in the Philippines' energy mix will get bigger and play a critical role for stakeholders.

The main objective for 2020 will be tapping and participating into current and upcoming LNG and natural gas infrastructure, distribution opportunities and potential partnerships along the value chain. Investors' interests in the sector remain bullish and are consistently looking forward to joining upcoming LNG-related projects. Currently there are interesting developments that are taking place in the Philippines with increasing players wanting to participate and collaborate to build both offshore and onshore LNG terminals within the Philippines.

As the industry anticipates a major LNG terminal being completed and commissioned within the next couple of years, there are at least 3 more related LNG projects in the Philippines that accelerate goals to become an LNG hub.

Taking on the theme, "Developing and integrating the natural gas and LNG value chain to support upcoming LNG import and storage Infrastructure for the Power Generation Industry" this business-critical forum will continue to address and propagate LNG import infrastructure that can bring the Philippines closer to becoming an LNG hub.

This is the perfect opportunity for all serious stakeholders to highlight real opportunities and establish their position in this vibrant marketplace.

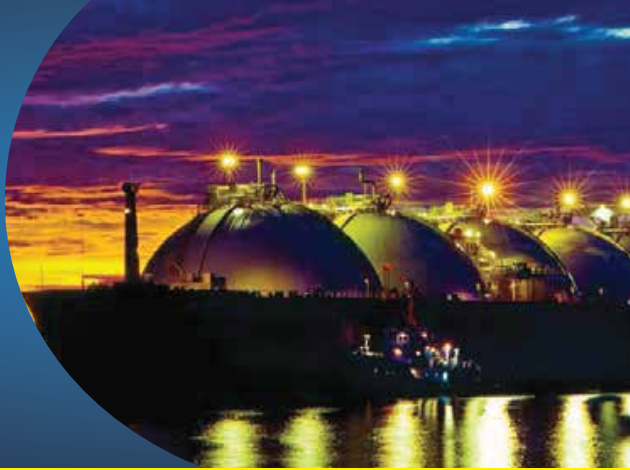

More information about Philippines's LNG potential is available from the website.

WHAT HAPPENED IN 2018?

The Philippines's LNG series was started in 2013 and our goal is to consistently promote and provide a neutral platform addressing business opportunities and successful case studies sharing that will help build Philippines's natural gas and LNG industry.

2018 attracted around 157 delegates from 9 countries with 70% of delegates are stakeholders and investors based in the Philippines. The main sponsors are Cheniere Energy and Wison Offshore and Marine. Some of the participants include House of Representatives – Philippines, Department of Energy, Philippines National Oil Company, First Gen, Meralco, Phoenix Petroleum, International Finance Corporation, Osaka Gas, Axi LNGAS, Vires Energy, Quezon Power, SK E&S, Supreme Power, Tokyo Boeki, Phinma Energy, Philex, AG&P, PT MAN Energy Solutions, PT PGN, PT PGN LNG, Phinma Petroleum and Geothermal, Philippine Economic Zone Authority, Petronas LNG, Osaka Gas, Osaka Gas Singapore, Oiltanking, Asia, NGCP, MRC Allied, Mitsui, MOL, Metro Pacific Investments, Marubeni, JBIC, McConnell Dowell, JBIC, LNG Japan Corporation, Islas Tankers Seatransport Corporation, Asian Development Bank, Hoegh LNG Asia, Hansei Corporation, Gas Natural Fenosa LNG Singapore Pte Ltd, FSC Metal Corporation, Exxon Mobil Indonesia, Embassy of the Kingdom of the Netherlands, Embassy of Spain in Manila, Embassy of Japan, Eastern Petroleum, COWI, DTI- UK, China Banking Corporation, BW Energy Services, British Columbia - Trade & Investment Office, BDO Capital & Investment Corporation and AG&P among many others.

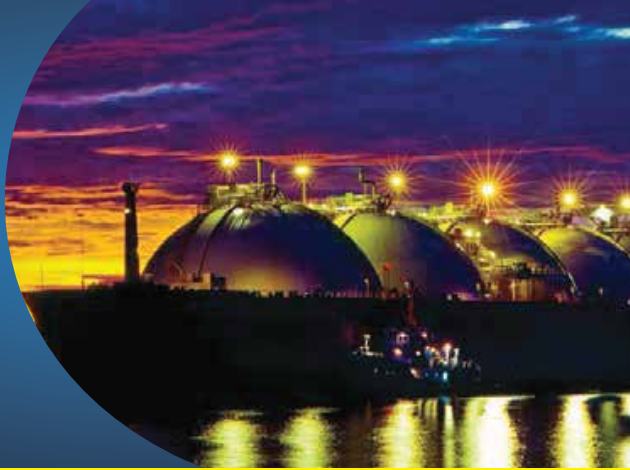

2018's forum provided business and feasible strategies addressed by key regional stakeholders in the anticipation of upcoming *integration of import infrastructures along Philippines's LNG value chain*.
